DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims rejected under 35 U.S.C. 102(e) as being anticipated by Denyer et al.

6192876

The applied reference has a common Assignee with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

3. Denyer et al. teaches a system for delivery of a drug to a patient comprising: a drug delivery device arranged to delivery a dose of the drug to the patient over a plurality of breaths, the device including a breath analyzer which (i) analyses a patient's breathing during the drug delivery, wherein the analysis by the breath analyzer includes quantitatively measuring at least one parameter of the patient's breathing; and (ii) generates breath information on a patient's breathing during drug delivery wherein the

Art Unit: 3731

breath information includes the at least one quantitative measurement of the patient's breathing (col. 3, lines 21-33); a data carrier; a data analyzer and a trend generator (col. 3, lines 57-63); and means for identifying non-compliant use of the drug delivery device (col. 3, lines 54-56).
